Complete picture: Combines traditional, bottom-up financial analysis with sustainability factors to evaluate a broader scope of future opportunities and risks

Top Countries: Overweights

Top Countries: Underweights

Average Annual Total Returns (%)

Share class	QTD	YTD	1-year	3-year	5-year	10-year
Class R6	-15.01	-7.50	-7.50	7.74	3.03	9.54
Institutional Service Class	-15.03	-7.57	-7.57	7.64	2.94	9.48
MSCI World Free Index	-13.42	-8.71	-8.71	6.30	4.56	9.67
Category	-12.94	-9.64	-9.64	5.69	3.72	9.33

Performance returns assume the reinvestment of all distributions. Returns for periods less than one year are not annualized. Total returns reflect a contractual expense limitation for direct annual Fund expenses for all classes for certain periods since inception, without which returns would have been lower. Pre-inception historical performance for newer share classes is based on the corresponding share class performance of a Fund's predecessor fund. If no predecessor Fund applies, historical performance is based on that of the longest existing share class, adjusted for sales charges if applicable.

Share class	Expense ratios		Inception date
	Gross (%)	Net (%)	
Class R6	1.19	0.95	01/28/1994
Institutional Service Class	1.28	1.04	11/21/2012

The expense ratios are as shown in the most recent prospectus. Expenses include underlying fund expenses. The difference between gross and net operating expenses reflects contractual fee waivers in place through 06/30/2019. Please see the Fund's prospectus for more details.

Growth of \$10k (01/01/14-12/31/18)

The results shown represent past performance; past performance does not guarantee future results. Current performance may be lower or higher than the past performance shown. Share price, principal value, and return will vary, and you may have a gain or a loss when you sell your shares. To obtain the most recent month-end performance, go to nationwide.com/mutualfunds or call 800-848-0920.

Sales charges and 12b-1 Fees: Institutional Service Class - no sales charge, no 12b-1 fee. Class R6 shares - no sales charge, no 12b-1 fee.

*Formerly known as Nationwide Global Equity Fund.

UBS Asset Management (Americas) Inc., Subadviser
 Bruno Bertocci, Fund tenure since 2015
 Joseph R. Elegante, Fund tenure since 2015

• Not a deposit • Not FDIC or NCUSIF insured • Not guaranteed by the institution • Not insured by any federal government agency • May lose value

DEFINITIONS: **Average annual total returns** are the annual compounded returns that would have produced the cumulative total return if fund performance had been constant during the given period. **P/E ratio** is the price of a stock divided by trailing 12-month earnings per share. **Sharpe ratio** measures excess return per unit of risk (standard deviation). A higher Sharpe ratio suggests better risk-adjusted performance. **Standard deviation** measures performance fluctuation, may not be indicative of future risk and is not a predictor of returns. **Alpha** represents the excess returns of a fund relative to its benchmark. A positive alpha is the added value an active manager has contributed over the benchmark returns. **Beta** measures volatility in relation to the fund's benchmark. A beta of less than 1.0 indicates lower volatility, while a beta of more than 1.0 indicates higher volatility relative to the benchmark. **R-Squared** measures the percentage of a fund's movements that can be explained by movements in a benchmark. **Turnover** measures how frequently investments are bought and sold within a fund during a 12 month period. The portfolio turnover rate is as of the fund's fiscal year end and is usually expressed as a percentage of the total value of a fund.

For more information about the available underlying investment options, please consult a fund prospectus. Carefully consider the investment objectives, risks, charges and expenses. Prospectuses contain this and other important information and should be read carefully before investing. To request a copy, call 1-888-867-5175 or visit your plan's website.

KEY RISKS: The Fund is subject to the risks of investing in equity securities (including small companies). Smaller companies are usually less stable in price and less liquid than larger, more established companies. Smaller companies are more vulnerable than larger companies to adverse business and economic developments and may have more limited resources. Therefore, they generally involve greater risk. The Fund also is subject to the risks of investing in foreign securities (currency fluctuations, political risks, differences in accounting and limited availability of information, all of which are magnified in emerging markets). The Fund may concentrate on specific countries, subjecting it to greater volatility than that of other mutual funds. Sustainability factors used in the subadviser's investment process will likely make the Fund perform differently from a fund that relies solely or primarily on financial metrics. The Fund may invest in more-aggressive investments such as derivatives (which create investment leverage and are highly volatile). Please refer to the most recent prospectus for more detailed information.

MSCI World Index Free: An unmanaged, free float-adjusted, market capitalization-weighted index that is designed to measure the performance of large-cap and mid-cap stocks in global developed markets as determined by MSCI. The "Free" suffix denotes an index with a somewhat different history but the same constituents and performance in relation to its counterpart index without the suffix. Market index performance is provided by a third-party source Nationwide Funds Group deems to be reliable (Morningstar). Indexes are unmanaged and have been provided for comparison purposes only. No fees or expenses have been reflected. Individuals cannot invest directly in an index.
