Performance returns assume the reinvestment of all distributions. Returns for periods less than one year are not annualized. Total returns reflect a contractual expense limitation for direct annual Fund expenses for all classes for certain periods since inception, without which returns would have been lower. Pre-inception historical performance for newer share classes is based on the corresponding share class performance of a Fund's predecessor fund. If no predecessor Fund applies, historical performance is based on that of the longest existing share class, adjusted for sales charges if applicable.

Share class	Expense ratios		Inception date
	Gross (%)	Net (%)	
Class R6	0.45	0.45	09/18/2013
Institutional Service Class	0.53	0.53	11/02/2004

The expense ratios are as shown in the most recent prospectus. Expenses include underlying fund expenses. Please see the Fund's prospectus for more details.

¹Formerly "Institutional Class" shares.

²Credit Quality specifies the percentages of the Fund's underlying holdings that are rated by Standard & Poor's Ratings Services (Standard & Poor's) to indicate the issuer's creditworthiness. Standard & Poor's bond credit ratings typically range from AAA (highest) to D (lowest). These ratings are not absolute standards of quality and do not provide assurance against default or other loss of principal value. Securities that are not rated by either agency are listed as "Not Rated." Ratings do not apply to the Fund itself or to Fund shares. Ratings may change.

DEFINITIONS: **Average annual total returns** are the annual compounded returns that would have produced the cumulative total return if fund performance had been constant during the given period. **Average maturity** is the weighted average time period for which the debt securities remain outstanding. Changes in interest rates have greater impact on funds with longer average maturity. **Effective duration** is an estimate of bond price sensitivity to changes in interest rates. The higher the duration, the greater the change (i.e., higher risk) in relation to interest-rate movements. **SEC 30-day yield** takes into account a fund's expense reduction, and reflects an estimated "yield to maturity" for a fund's entire portfolio. It should be regarded as an estimate of the fund's rate of investment income, and it may not equal the fund's actual income distribution rate, which reflects a fund's past dividends paid to shareholders. The calculation is in accordance with SEC standards. **SEC 30-day yield w/o waiver** does not take into account a fund's expense reduction, and reflects an estimated "yield to maturity" for a fund's entire portfolio. **Standard deviation** measures performance fluctuation, may not be indicative of future risk and is not a predictor of returns. **Turnover** measures how frequently investments are bought and sold within a fund during a 12 month period. The portfolio turnover rate is as of the fund's fiscal year end and is usually expressed as a percentage of the total value of a fund.

For more information about the available underlying investment options, please consult a fund prospectus. Carefully consider the investment objectives, risks, charges and expenses. KEY RISKS: The Fund is subject to the risks of investing in fixed-income securities including default risk and interest rate risk. The Fund also is subject to the risks of investing in foreign securities (which may be more volatile, harder to price and less liquid than U.S. securities). Please refer to the most recent prospectus for more detailed information.

Bloomberg Barclays U.S. Government/Credit 1-3 Year Index: An unmanaged index that measures the performance of non-securitized component of the U.S. Aggregate Index with maturities of 1-3 years, including Treasuries, government-related issues and corporates. Market index performance is provided by a third-party source Nationwide Funds Group deems to be reliable (Morningstar). Indexes are unmanaged and have been provided for comparison purposes only. No fees or expenses have been reflected. Individuals cannot invest directly in an index.
