

NVIT Bond Index Fund

Nationwide VIT

Fact sheet

Q4 2018
AS OF 12/31/18

Objective: Seeks to match the performance of the Bloomberg Barclays U.S. Aggregate Bond Index as closely as possible before the deduction of Fund expenses

Class I

Asset class: Taxable Bond
Morningstar category: Intermediate-Term Bond

Passive strategy:

Invests in bonds and other fixed income securities that are included in or correlated with the benchmark

Low cost design:

Utilizes a low turnover passive management approach to help lower costs

Fixed income expertise:

Provides access to a team of highly seasoned fixed income investment professionals

Not Rated	0.1

Average Annual Total Returns (%)

Share class	QTD	YTD	1-year	3-year	5-year	10-year
Class I	1.52	-0.36	-0.36	1.66	2.18	3.18
BBgBarc US Agg Bond Index	1.64	0.01	0.01	2.06	2.52	3.48
Category	0.98	-0.60	-0.60	2.23	2.46	4.46

Performance returns assume the reinvestment of all distributions. Returns for periods less than one year are not annualized. Total returns reflect a contractual expense limitation for direct annual Fund expenses for all classes for certain periods since inception, without which returns would have been lower. Performance numbers do not reflect and would be reduced by the insurance-related fees and charges of the variable product. Please consult the variable product prospectus for information about these fees and charges. Pre-inception historical performance for newer share classes is based on the corresponding share class performance of a Fund's predecessor fund. If no predecessor Fund applies, historical performance is based on that of the longest existing share class, adjusted for sales charges if applicable.

Share class	Expense ratios		Inception date
	Gross (%)	Net (%)	
Class I	0.38	0.38	04/30/2014

The expense ratios are as shown in the most recent prospectus. Expenses include underlying fund expenses. Please see the Fund's prospectus for more details.

Growth of \$10k (05/01/14-12/31/18)

The results shown represent past performance; past performance does not guarantee future results. Current performance may be lower or higher than the past performance shown. Share price, principal value, and return will vary, and you may have a gain or a loss when you sell your shares. For the most recent standardized performance, visit <https://www.nationwide.com/variable-annuity-prospectus-and-performance.jsp> or <https://www.nationwide.com/variable-life-products.jsp>. Data shown in the Growth of \$10k chart is based on share class inception.

¹Credit Quality specifies the percentages of the Fund's underlying holdings that are rated by Standard & Poor's Ratings Services (Standard & Poor's) to indicate the issuer's creditworthiness. Standard & Poor's bond credit ratings typically range from AAA (highest) to D (lowest). These ratings are not absolute standards of quality and do not provide assurance against default or other loss of principal value. Securities that are not rated by either agency are listed as "Not Rated." Ratings do not apply to the Fund itself or to Fund shares. Ratings may change.

Portfolio Characteristics

Total Net Assets (all classes)	\$2.2B

DEFINITIONS: **Average annual total returns** are the annual compounded returns that would have produced the cumulative total return if fund performance had been constant during the given period. **Average maturity** is the weighted average time period for which the debt securities remain outstanding. Changes in interest rates have greater impact on funds with longer average maturity. **Effective duration** is an estimate of bond price sensitivity to changes in interest rates. The higher the duration, the greater the change (i.e., higher risk) in relation to interest-rate movements. **SEC 30-day yield** takes into account a fund's expense reduction, and reflects an estimated "yield to maturity" for a fund's entire portfolio. It should be regarded as an estimate of the fund's rate of investment income, and it may not equal the fund's actual income distribution rate, which reflects a fund's past dividends paid to shareholders. The calculation is in accordance with SEC standards. **SEC 30-day yield w/o waiver** does not take into account a fund's expense reduction, and reflects an estimated "yield to maturity" for a fund's entire portfolio. **Standard deviation** measures performance fluctuation, may not be indicative of future risk and is not a predictor of returns. **Turnover** measures how frequently investments are bought and sold within a fund during a 12 month period. The portfolio turnover rate is as of the fund's fiscal year end and is usually expressed as a percentage of the total value of a fund.

Variable products are sold by prospectus. Both the product and underlying fund prospectuses can be obtained by visiting Nationwide.com/prospectus or by calling 1-800-848-6331. Before investing, carefully read and consider the fund's investment objectives, risks, charges, expenses, and other important information contained in this and the underlying funds' prospectuses.

NVIT Funds are not sold to individual investors. These investment options are underlying subaccounts and cannot be purchased directly by the public. They are only available through variable products issued by life insurance companies. There is no assurance that the investment objective of any fund (or that of any underlying fund) will be achieved or that a diversified portfolio will produce better results than a non-diversified portfolio. Diversification does not guarantee returns or insulate an investor from potential losses, including the possible loss of principal. When evaluating the purchase of a variable annuity product, your clients should be aware that variable annuity products are long-term investment vehicles designed for retirement purposes and will fluctuate in value; and investing involves market risk, including possible loss of principal.

KEY RISKS: The Fund seeks to match the performance of an index. Correlation between Fund performance and index performance may be affected by Fund expenses, index composition changes, and the timing of Fund share purchases and redemptions. The Fund is subject to the risks of investing in fixed-income securities including default risk and interest rate risk. The Fund also is subject to the risks of investing in foreign securities (which may be more volatile, harder to price and less liquid than U.S. securities). Please refer to the most recent prospectus for more detailed information.

Bloomberg Barclays US Aggregate Bond Index: An unmanaged, market value-weighted index of U.S. dollar-denominated, investment-grade, fixed-rate, taxable debt issues, which includes Treasuries, government-related and corporate securities, mortgage-backed securities (agency fixed-rate and hybrid adjustable-rate mortgage pass-throughs), asset-backed securities and commercial mortgage-backed securities (agency and non-agency). Market index performance is provided by a third-party source Nationwide Funds Group deems to be reliable (Morningstar). Indexes are unmanaged and have been provided for comparison purposes only. No fees or expenses have been reflected. Individuals cannot invest directly in an index. © 2019 Morningstar. All Rights Reserved.
