¹The fund ranked in the 68th percentile for the 1-year period, 3rd for the 3-year period and 3rd for the 5-year period ended 9/30/24.

²Among 325 multisector bond funds based on risk-adjusted returns as of 9/30/24.

The results shown represent past performance; past performance does not guarantee future results. Current performance may be lower or higher than the past performance shown. Share price, principal value, and return will vary, and you may have a gain or a loss when you sell your shares. To obtain the most recent month-end performance, go to nationwide.com/mutualfunds or call 800-848-0920.

Share class	YTD	1-year	3-year	5-year	Since inception
Institutional Service Class	8.04	11.73	4.99	5.11	6.04
Bloomberg US Aggregate Bond Index	4.45	11.57	-1.39	0.33	—

As of 9/30/24. Performance returns assume the reinvestment of all distributions. Returns for periods less than one year are not annualized. Total returns reflect a contractual expense limitation for direct annual Fund expenses for all classes for certain periods since inception, without which returns would have been lower.

• Not a deposit • Not FDIC or NCUSIF insured • Not guaranteed by the institution • Not insured by any federal government agency • May lose value

This material is not a recommendation to buy or sell a financial product or to adopt an investment strategy. Investors should discuss their specific situation with their financial professional.

Call 1-800-848-0920 to request a summary prospectus and/or a prospectus, or download prospectuses at nationwide.com/mutual-funds-prospectuses.jsp. These prospectuses outline investment objectives, risks, fees, charges and expenses, and other information that should be read and carefully considered before investing.

KEY RISKS: The Fund is subject to the risks of investing in fixed-income securities, including high-yield bonds (which are more volatile). The Fund may invest in corporate loans (which have speculative characteristics and are high risk). The Fund also is subject to the risks of investing in foreign securities (currency fluctuations, political risks, differences in accounting and limited availability of information, all of which are magnified in emerging markets). The Fund may concentrate on specific sectors or countries, subjecting it to greater volatility than that of other mutual funds. The Fund may invest in more-aggressive investments such as derivatives (many of which create investment leverage and illiquidity and are highly volatile). The Fund may invest in sovereign debt (a governmental entity may delay or refuse to pay interest or repay principal). Funds that invest in high-yield securities are subject to greater default risk, liquidity risk and price fluctuations than funds that invest in higher-quality securities. The prices of high-yield bonds tend to be more sensitive to adverse economic and business conditions than are higher-rated corporate bonds. Increased volatility may reduce the market value of high-yield bonds. They are also subject to the claims-paying ability of the issuing company. The Fund's holdings may subject the Fund to liquidity risk, making it more volatile than other mutual funds. Please refer to the most recent prospectus for more detailed information.

Morningstar Ratings are based solely on a proprietary mathematical formula based on measures of risk and performance that it recalculates each month. The ratings formula measures the amount of variation in a fund's or ETF's monthly performance (excluding the effects of sales charges and loads) emphasizing downward variations and rewarding consistency. Ratings are subject to change every month. The top 10% of funds and ETFs in the category receive 5 stars; the next 22.5%, 4 stars; the next 35%, 3 stars; the next 22.5%, 2 stars; and the bottom 10%, 1 star. Other share classes may have different performance characteristics. Ratings are based on each fund's Class IS performance. Current fund performance may be higher or lower, which may change a fund's star rating. Despite high ratings, funds may have experienced negative performance during the period. The fund received 5 and 4 stars (Class A), 5 and 5 stars (Class R6), and 5 and 4 stars (Institutional Share Class) for the 3- and 5- year period among 325 and 272 funds, respectively. © 2024 Morningstar. Percentile rankings are based on average annual returns. Morningstar percentile rank is a standardized way of ranking items within a peer group, in this case, funds with the same Morningstar Category. The observation with the largest numerical value is ranked one; the observation with the smallest numerical value is ranked 100. The remaining observations are placed equal distance from one another on the rating scale. Note that lower percentile ranks are generally more favorable for returns (high returns), while higher percentile ranks are generally more favorable for risk measures (low risk). Morningstar Multisector Bond Category is ranked among 358 funds ranked 1-year, 325 funds ranked 3-years, 272 funds ranked 5-years and 249 funds since inception.

Bloomberg US Aggregate Bond Index: An unmanaged, market value-weighted index of U.S. dollar-denominated, investment-grade, fixed-rate, taxable debt issues, which includes Treasuries, government-related and corporate securities, mortgage-backed securities (agency fixed-rate and hybrid adjustable-rate mortgage pass-throughs), asset-backed securities and commercial mortgage-backed securities (agency and nonagency).
