

Evaluating the new normal

When it comes to Social Security, many people lack an overall understanding. This survey helps identify consumers' overall feelings and behaviors towards Social Security, especially post-COVID-19, in order to help create a financially stable future.

The knowledge gap

Many people aren't knowledgeable of the ins and outs of Social Security.

This material is not a recommendation to buy, sell, hold or roll over any asset, adopt an investment strategy, retain a specific investment manager or use a particular account type. It does not take into account the specific investment objectives, tax and financial condition, or particular needs of any specific person. Investors should discuss their specific situation with their financial professional.

The COVID-19 Social Security survey was conducted online within the United States between May 15-19, 2020 among 2,026 adults (aged 18 and over) by The Harris Poll on behalf of The Nationwide Retirement Institute via its Harris On Demand omnibus product.

Nationwide Retirement Institute's seventh annual Social Security survey conducted February 19-March 6, 2020 among 1,727 U.S. adults age 24 or older who currently collect or plan to collect Social Security benefits.

Respondents for these surveys were selected from among those who have agreed to participate in our surveys. Because the sample is based on those who agree to participate in the online panel, no estimates of theoretical sampling error can be calculated. Data are weighted where necessary by age by gender, race/ethnicity, region, education, income, marital status, and propensity to be online to bring them in line with their actual proportions in the population.
