It's natural to want to know how your investments are doing over time. This performance report shows how the options in the Plan have performed over a series of time periods.

Fees and Expenses:

ADMINISTRATOR'S FEE: If applicable, an annualized \$0 administrator's fee may be charged and would reduce the performance shown.

GROSS EXPENSE RATIO: Gross expense ratios represent the fund's total operating expenses expressed as a percentage of the assets held in the fund. Your expenses may be less than the gross expense ratio. For more information about gross expense ratios, read the fund's prospectus.

SHORT-TERM TRADE FEES: Some funds may impose a short-term trade fee. Some funds may be subject to a trade-restriction policy. This information is explained in the underlying prospectus.

INVESTMENT OPTION ("FUND") FEES: The returns are reported after the fees that the fund manager charges have been applied, but do not reflect plan administration fees.

PLAN ASSET FEE: The rates of return shown in this performance report do not reflect a maximum deduction of a **0.00%** annual plan asset fee, which, if reflected, would reduce the performance shown.

* denotes a fee of 0.00%

Please consider the fund's investment objectives, risks, and charges and expenses carefully before investing. Both the underlying fund prospectuses and informational brochure contain this and other important information, and are available by calling 877-677-3678. Read carefully before investing.

Asset Class: Asset Allocation

These funds are designed to provide diversification and asset allocation across several types of investments and asset classes. Because they primarily invest in underlying funds, their expense ratio includes a proportionate share of the applicable fees and expenses of the underlying funds. There is no guarantee that target date funds will provide enough income for retirement.

Money market funds are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other federal government agency. Although they seek to preserve the value of your investment at \$1.00 per share, it's possible to lose money by investing in money market funds.

Because the value of the securities held by stable value funds will fluctuate, there is the risk that an investor will lose money investing in stable value funds.
