No warranty is given by the Trustee or Investment Adviser as to the performance or profitability of any Fund, and there is no guarantee that any Fund will achieve its investment objective. A Fund may suffer loss of principal, and income, if any, will fluctuate. The value of a Fund's investments will be affected by a variety of factors, including, but not limited to, economic and political developments, interest rates, issuer-specific events, market conditions and sector positions. Investment in a Fund is not a deposit or obligation of the Trustee or of any other bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation, Securities Investor Protection Corporation, or any other government agency or instrumentality.

Important Facts

The unit value of the Fund changes daily, based upon the market value of the underlying securities. The Fund is subject to wide fluctuations in unit value because it holds virtually all assets in common stocks.

Information Accessibility

Since this is not a mutual fund, information is not available from a newspaper or other public information sources. The plan's recordkeeper will provide your account information over the internet and through an automated telephone system.

Prospectus Information

The Bond Fund is a portfolio of assets managed specifically for your plan. Unlike a mutual fund, only the participants of your plan can invest in the Fund. Therefore, because it is not a mutual fund, a prospectus is not available. This summary is designed to provide descriptive information and through an automated telephone system.

Additional Disclosures

The Bloomberg Barclays U.S. Aggregate Bond Index is a broad-based flagship benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, MBS (agency fixed-rate pass-throughs), ABS and CMBS (agency and non-agency).

The Fund may use futures, options, or other derivatives, and is operated by a person who has claimed an exclusion from the definition of a commodity pool operator under the Commodity Exchange Act and is, therefore, not subject to registration or regulation under that Act. The investment managers may use futures, options, swaps, or other derivatives as a substitute for taking a position in the underlying asset; to seek to take advantage of changes in securities prices, interest rates, and other factors affecting value; to hedge risk; to maintain liquidity; or for other reasons. Each of these strategies has its own risks and could decrease the value of the Fund. The managers of the Fund currently do not expect to make significant use of derivatives in implementing its investment strategy.

The Program allows the Custodian to lend securities within the Fund, which entails risk. The primary risks include the possibility of the borrower becoming insolvent and the potential for the value of the collateral provided to fall below the cost of replacing the lent securities. If both of these events were to occur, the Fund would incur a financial loss equal to the difference between the two, potentially negatively impacting the performance of the Fund. Securities lending revenue earned by the Plan is used to help offset Savings Plus administrative expenses.
