The results shown represent past performance and do not represent expected future performance or experience. Past performance does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's units, when redeemed, may be worth more or less than their original cost. The index returns do not include the deduction of investment management and trustee services fees which would lower a participant's return.

Additional Disclosures

The Bloomberg Barclays 1-3 Year Government/Credit Bond Index is a broad-based flagship benchmark that measures the non-securitized component of the U.S. Aggregate Index. It includes investment grade, U.S. dollar-denominated, fixed-rate Treasuries, government-related and corporate securities. Provided the necessary inclusion rules are met, U.S. Government/Credit-eligible securities also contribute to the multi-currency Global Aggregate Index and the U.S. Universal Index, which includes high yield and emerging markets debt. The index was launched on January 1, 1979, with index history backfilled to 1973. No fees or commissions are subtracted from index returns and it is not possible to invest directly in a market index.

The Program allows the Custodian to lend securities within the Fund, which entails risk. The primary risks include the possibility of the borrower becoming insolvent and the potential for the value of the collateral provided to fall below the cost of replacing the lent securities. If both of these events were to occur, the Fund would incur a financial loss equal to the difference between the two, potentially negatively impacting the performance of the Fund. Securities lending revenue earned by the Plan is used to help offset Savings Plus administrative expenses.
