

New York State Deferred Compensation Plan

A Plan for Your Future

How Did Your Plan Investment Options Perform? Performance as of September 30, 2026

Returns are net of all fees charged by the investment option and represent change in net asset value with capital gains and dividends reinvested.

The appropriate market index for each fund or category of investment options is provided for comparison purposes only. They are unmanaged, and no fees or expenses have been reflected. Individuals cannot invest directly in an index.

Performance data represents past performance and is no guarantee of future results. Investment return and principal value will fluctuate and, therefore, you may have a gain or loss when you sell your shares. Current performance may be lower or higher than the data quoted. For performance current to the most recent month-end, visit www.nysdcp.com. Before investing, you should carefully consider the fund's investment objectives, risks, charges, and expenses. This and other information is contained in the fund prospectus or fact sheet, which is available by calling 1-800-422-8463. Read it carefully before you invest.

¹ Bond funds have the same interest rate, inflation and credit risks that are associated with the underlying bonds owned by the fund.

² Retirement Date trusts, also known as target date options, are asset allocation trusts that are based on a targeted date as to when an investor plans to begin to withdraw money. These trusts use a strategy that reallocates equity exposure to a higher percentage of fixed investments over time. As a result, the trusts become more conservative over time as you approach retirement. It's important to remember that no strategy can assure a profit or prevent a loss in a declining market. The principal value of the trust(s) is not guaranteed at any time, including at the target date. There is no guarantee that Retirement Date trusts will provide enough income for retirement.

³ Small cap stocks have higher risks than stocks of larger, more established companies and have significant short-term price volatility.

⁴ International investing involves additional risks, including: currency fluctuations, political instability and foreign regulations.

⁵ Ticker symbols are provided to help research investment option pricing, performance and other information in publicly available media. The information specific to your plan may be different than the data publicly available. Collective Investment Trusts (CITs) and Custom Funds do not have a ticker symbol. Information on these options can be found within the Fact Sheets on the Plan's Website at www.nysdcp.com or by calling the HELPLINE.

⁶ Mutual fund reimbursements are contractual.

⁷ Classes may be created and funded after the initial funding of the Trust (i.e., the first funded class) but we show the initial inception of the Trust for purposes of showing performance.

⁸ These options should be considered supporting funds and not part of the core lineup. Because of the diversity of the funds, a benchmark is not provided in this category.

[^] This class of the Trust inceptioned after the inception date shown above for the Trust generally. Net of fees performance for periods prior to the inception of this class (and, if applicable, for periods when this class was subsequently unfunded) was calculated using the historical gross returns of the Trust and then deducting the applicable fee.

^{*} The historical performance for the CF-P Class in the performance table prior to its inception on July 10, 2025, is based on the performance of the CF-F Class of the Fund, which invests in the same portfolio of securities. All prior class performance has been adjusted to reflect the differences in the expenses between classes.

[#] This class of the Trust inceptioned after the inception date shown above for the Trust generally. The performance for periods prior to the inception of this class was calculated using linked performance of the Class D and Class K trusts.

Shares of any investment fund available under the Plan are not guaranteed or insured by the federal government, New York State, or any other employer maintaining the Plan. The annual administrative fee is a combination of a \$20 fixed fee and an asset-based fee (currently 2.75 basis points) levied in two installments each April and October. The asset-based fee is not levied on accounts below \$20,000 or on account assets that exceed \$200,000. Also, the timing of your contributions and other transactions under the Plan can result in returns greater than or less than these illustrated returns.

Prospectuses and fact sheets are available at www.nysdcp.com or upon request at 1-800-422-8463. If you decide to direct investment of your contributions to any fund in the future, please read each prospectus carefully for more information, including investment objectives, management fees, and other charges and expenses.

Some mutual funds may impose a short term trade fee. Some funds may be subject to a trade restriction policy. Please read the underlying prospectuses carefully.

This investment performance report gives information which is intended to help participants understand what investment alternatives are available to them under the Plan. If you need tax or legal advice, please ask your certified public accountant or lawyer. While we are pleased to help keep you up-to-date on your retirement account, nothing in this investment performance report can change the terms of the Plan or any investment contract.

The Plan charges an administrative fee in April and October of each Plan year. Plan charges directly reduce your account value equally regardless of investment selection.
