Variable Annuity

As of September 30, 2018

Nationwide DestinationSM Architect 2.0 Variable Annuity

Prepare for retirement with a variable annuity from Nationwide[®]

Nationwide DestinationSM Architect 2.0 Variable Annuity is a variable annuity designed to help you build a source of income for retirement.

Variable annuity features

Variable annuities are available from insurance companies such as Nationwide[®]. You can also personalize your annuity contract around your specific financial needs with optional benefits and protections available at an additional cost.

Some important details

All guarantees and protections, where available, are subject to the claims-paying ability of Nationwide Life Insurance Company.

Remember, annuities do have some limitations. They are designed for long-term investing which involves market risk. You may be charged penalties if:

- You take your money out early
- You're not yet 59½ (additional 10% tax penalty)
- Or both

If you do take a withdrawal, your death benefit* and contract value will be reduced. Withdrawals from your annuity may be subject to ordinary income taxes.

Variable annuities have fees and charges that may include mortality and expense risk charges, administrative fees and contract fees, as well as the expense of the underlying investment options.

* Death benefit: The payment that the investor's beneficiary or estate receives when the annuitant dies.

• Not a deposit • Not FDIC or NCUSIF insured • Not guaranteed by the institution • Not insured by any federal government agency • May lose value

Quality investments — confident choices

Quality investments can help you feel more secure about the investment decisions you make. At Nationwide, we devote both time and effort to bring you a lineup of solid investment options from some of the leading money managers in the marketplace.

Morningstar “star ratings” — a symbol of investment excellence

Morningstar Inc. developed “star ratings” to help investors and investment professionals compare investment options based on risk and return. Five-star investment options rank in the top 10% of their categories; four-star investment options rank in the next 22.5% of their categories.

Keep in mind that Morningstar ratings look at past performance. An investment option’s past performance does not indicate or guarantee future results. You should consider the investment’s management style and strategy, as well as how it fits in a portfolio, before making the decision to invest.

Actual current performance of any of these investments may be negative, regardless of the Morningstar rating shown here, depending on the performance return period shown. To obtain standardized performance data current to the most recent month-end or for closed and walled-off funds, please call 1-800-848-6331 or visit nationwide.com.

Morningstar Four- and Five-Star Rated Investments

Of the 133 investment options available in the Nationwide Destination Architect 2.0 Variable Annuity, 130 have been rated by Morningstar as of September 30, 2018. Of these rated investments, 44 have received a four- or five-star rating. We've listed these investment options in the following tables. Star ratings are based on risk-adjusted returns.

Five-Star Overall Rated Funds		3 Years	5 Years	10 Years

Number of Funds in Morningstar Category

Each investment option is assigned a category by Morningstar based on its investment objective and underlying holdings. Star ratings are then assigned within these categories to allow investors to distinguish among funds that use similar investment strategies. In the chart below, you'll find the number of funds in each Morningstar category as of September 30, 2018. For more details on how Morningstar assigns its ratings, please see Page 6.

Morningstar rating details

Morningstar ratings metrics

Morningstar ratings are calculated monthly with a proprietary mathematical formula based on measures of risk and performance. The ratings formula measures the amount of variation in the monthly performance (excluding the effects of sales charges and loads) of a fund or exchange-traded fund (ETF), emphasizing downward variations and rewarding consistency. Ratings are subject to change every month. The top 10% of funds and ETFs in the category receive 5 stars; the next 22.5%, 4 stars; the next 35%, 3 stars; the next 22.5%, 2 stars; and the bottom 10%, 1 star. As of November 1, 2016, Morningstar no longer provides ratings for load-adjusted share classes.

Ratings are based on the specific class performance of each fund. Current fund performance may be higher or lower, which may change a fund's star rating. Despite high ratings, funds may have experienced negative performance during the period. Performance may reflect a waiver of part of a fund's fees for certain periods since inception, without which returns would have been lower. Morningstar and Nationwide are not affiliated.

PAST PERFORMANCE DOES NOT GUARANTEE FUTURE RESULTS.

Variable products are sold by prospectus. Both the product and underlying fund prospectuses can be obtained by visiting Nationwide.com/prospectus or by calling 1-800-848-6331. Before investing, carefully read and consider the fund's investment objectives, risks, charges, expenses, and other important information contained in this and the underlying funds' prospectuses.

Below is a list of risk disclosures for the subaccounts in our variable products. The underlying investment options described in this brochure are available only as investment options in variable life insurance policies and variable annuity contracts issued by life insurance companies. They are not offered or made available to the general public directly.

- ¹ **Government Money Market Funds: Funds are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The funds are open to all investors and although they seek to preserve the value of the investment at \$1.00 per share, they cannot guarantee they will do so. You could lose money by investing in a fund. A fund may impose a fee upon sale of shares or temporarily suspend the ability to sell shares if the fund's liquidity falls below required minimums because of market conditions or other factors. The fund's sponsor has no legal obligation to provide financial support to the fund, and you should not expect that the sponsor will provide financial support to the fund at any time.**
- ² International/Emerging markets funds: Funds that invest internationally involve risks not associated with investing solely in the United States, such as currency fluctuation, political risk, differences in accounting and the limited availability of information.
- ³ Small/Mid-cap funds: Funds investing in stocks of small-cap, mid-cap or emerging companies may have less liquidity than those investing in larger, established companies and may be subject to greater price volatility and risk than the overall stock market.
- ⁴ High-yield funds: Funds that invest in high-yield securities are subject to greater credit risk, liquidity risk, and price fluctuations than funds that invest in higher-quality securities. The prices of high-yield bonds tend to be more sensitive to adverse economic and business conditions than higher-rated corporate bonds. Increased volatility may reduce the market value of high-yield bonds. They are also subject to the claims-paying ability of the issuing company.
- ⁵ Nondiversified funds: Funds that invest in a concentrated sector or focus on a relatively small number of securities may be subject to greater volatility than a more diversified investment.
- ⁶ Government funds: While the funds invest primarily in the securities of the U.S. government and its agencies, the values are not guaranteed by these entities.
- ⁷ Real estate funds: Funds that focus on real estate investing are sensitive to economic and business cycles, changing demographic patterns and government actions.
- ⁸ Fund-of-funds: Designed to provide diversification and asset allocation across several types of investments and asset classes, primarily by investing in underlying funds. Therefore, in addition to the expenses of the portfolio, you are indirectly paying a proportionate share of the applicable fees and expenses of the underlying funds.⁹ Bond funds: These funds have the same interest rate, inflation and credit risks associated with the underlying bonds owned by the fund. Interest rate risk is the possibility of a change in the value of a bond due to changing interest rates. Inflation risk arises from the decline in value of cash flows due to loss of purchasing power. Credit risk is the potential loss on an investment based on the bond issuer's failure to repay on the amount borrowed.
- ⁹ Bond funds: These funds have the same interest rate, inflation and credit risks associated with the underlying bonds owned by the fund. Interest rate risk is the possibility of a change in the value of a bond due to changing interest rates. Inflation risk arises from the decline in value of cash flows due to loss of purchasing power. Credit risk is the potential loss on an investment based on the bond issuer's failure to repay on the amount borrowed.
- ¹⁰ A short-term trading fee may apply for exchanges made within 60 days of original allocation to this fund. Please refer to the prospectus for details.
- ¹¹ These funds may include increased volatility due to the use of options or futures. Leveraged exposure can result in accelerated losses as well as accelerated gains, depending on how much the market moves. Funds dedicated to Inverse and Leveraged strategies include risk compared to funds that do not use these strategies and are not meant to be long term buy and hold strategies.
- ¹² For six trades occurring within a calendar quarter, Nationwide will issue a warning letter. If there are more than 11 trades in two consecutive quarters or 20 trades occurring within a calendar year involving limited transfer funds, Nationwide may limit contract owner to submitting transfer requests involving limited transfer funds via U.S. mail on a Nationwide-issued form. See prospectus for more details.
- ¹³ Managed volatility funds: Funds that are designed to offer traditional long-term investments blended with a strategy that seeks to mitigate risk and manage portfolio volatility. These funds may not be successful in reducing volatility, and it is possible that the funds' volatility management strategies could result in losses greater than if the fund did not use such strategies.
- ¹⁴ Tactical income: Seeks to adjust holdings based on perceived market fluctuations. This may result in adjustments made prior to an increase or decline in the market which could lead to greater losses than expected or smaller returns.
- ¹⁵ Asset allocation funds: These funds may invest across multiple asset classes including, but not limited to, domestic and foreign stocks, bonds, and cash. The use of diversification and asset allocation as a part of an overall investment strategy does not assure a profit or protect against loss in a declining market.
- ¹⁶ Commodities/Natural resources: Specific uncertainties associated with commodities and natural resources investing include changes in supply-and-demand relationships due to environmental, economic, and political factors, which may cause increased volatility and decreased liquidity.
- ¹⁷ Private Equity Company funds: Investing in private equity companies involves inherent risks, which encompasses financial institutions or investment vehicles whose principal business is to invest in and lend capital to privately held companies. Generally, little public information exists for private and thinly traded companies, and there is a risk that investors may not be able to make a fully informed investment decision.
- ¹⁸ These funds may provide less common return patterns than traditional equity or fixed income. These funds incorporate investment strategies that may increase or decrease volatility due to the fund's use of options or futures. Leveraged exposure can result in accelerated losses as well as accelerated gains, depending on how the market moves.

This material is not a recommendation to buy, sell, hold, or roll over any asset, adopt an investment strategy, retain a specific investment manager or use a particular account type. It does not take into account the specific investment objectives, tax and financial condition or particular needs of any specific person. Investors should work with their financial professional to discuss their specific situation.

The underlying investment options cannot be purchased directly by the general public. They are only available through variable annuity and life insurance products, or in certain qualified pension or retirement plans.

Variable products are issued by Nationwide Life Insurance Company or Nationwide Life and Annuity Insurance Company, Columbus, Ohio. The general distributor is Nationwide Investment Services Corporation (NISC), Member FINRA. Nationwide Funds are distributed by Nationwide Fund Distributors LLC (NFD), Member FINRA, Columbus, Ohio.

NVIT Cardinal is a service mark of Nationwide Life Insurance Company. Nationwide, Nationwide Destination, Nationwide is on your side and the Nationwide N and Eagle are service marks of Nationwide Mutual Insurance Company. © 2018 Nationwide
