DFA Investment Dimensions Group — VIT Inflation-Protected Securities Portfolio — Institutional Class

Investment Strategy from investment's prospectus

The investment seeks to provide inflation protection and earn current income consistent with inflation-protected securities. The Portfolio seeks its investment objective by investing in a universe of inflation-protected securities that are structured to provide returns linked to the rate of inflation over the long-term. It ordinarily invests in inflation-protected securities issued by the U.S. government and its agencies and instrumentalities and the credit quality of such inflation-protected securities will be that of such applicable U.S. government, agency or instrumentality issuer.

Category Description: Inflation-Protected Bond

Inflation-protected bond portfolios invest primarily in fixed-income that increase coupon and/or principal payments at the rate of inflation. These bonds can be issued by any organization, but the U.S. Treasury is currently the largest issuer for these types of securities. Most of these portfolios buy bonds with intermediate- to long-term maturities.

Volatility Analysis

In the past, this investment has shown a relatively small range of fluctuations relative to other investments. Based on this measure, currently more than two thirds of all investments have shown higher levels of risk. Consequently, this investment may appeal to investors looking for a conservative investment strategy.
