

NVIT BlackRock Managed Global Allocation Fund — Class II

Investment Strategy from investment's prospectus

The investment seeks high total investment return consistent with preservation of capital over the long term. The fund consists of two main components. First, a majority of its portfolio, referred to herein as the "Core Sleeve," operates as a "fund-o

Past name: BlackRock NVIT Managed Global Allc II.

Category Description: Global Allocation

World-allocation portfolios seek to provide both capital appreciation and income by investing in three major areas: stocks, bonds, and cash. While these portfolios do explore the whole world, most of them focus on the U.S., Canada, Japan, and the larger markets in Europe. It is rare for such portfolios to invest more than 10% of their assets in emerging markets. These portfolios typically have at least 10% of assets in bonds, less than 70% of assets in stocks, and at least 40% of assets in non-U.S. stocks or bonds.

Volatility Analysis

In the past, this investment has shown a relatively small range of fluctuations relative to other investments. Based on this measure, currently more than two thirds of all investments have shown higher levels of risk. Consequently, this investment may appeal to investors looking for a conservative investment strategy.
