

BlackRock Total Return V.I. Fund — Class I

Investment Strategy from investment's prospectus

The investment seeks to maximize total return, consistent with income generation and prudent investment management. The fund seeks to provide current income by investing in securities that pay interest or dividends. It will invest at least 80%, and t

Past name: BlackRock Bond V.I. 1.

Category Description: Intermediate Core-Plus Bond

Intermediate-term core-plus bond portfolios invest primarily in investment-grade U.S. fixed-income issues including government, corporate, and securitized debt, but generally have greater flexibility than core offerings to hold non-core sectors such as corporate high yield, bank loan, emerging-markets debt, and non-U.S. currency exposures. Their durations (a measure of interest-rate sensitivity) typically range between 75% and 125% of the three-year average of the effective duration of the Morningstar Core Bond Index.

Volatility Analysis

In the past, this investment has shown a relatively small range of fluctuations relative to other investments. Based on this measure, currently more than two thirds of all investments have shown higher levels of risk. Consequently, this investment may appeal to investors looking for a conservative investment strategy.
