

# DFA Investment Dimensions Group Inc. — VA Global Moderate Allocation Portfolio — Institutional Class

## Investment Strategy from investment's prospectus

The investment seeks total return consisting of capital appreciation and current income. The fund under normal market circumstances, purchases shares of the underlying funds to achieve a moderate allocation to both global equity and global fixed income securities. Generally, the fund invests its assets in domestic and international equity underlying funds and fixed income underlying funds to achieve an allocation that provides a moderate allocation to global equity securities, with an allocation of approximately 55% to 75% of the fund's assets to domestic and international equity underlying funds and 25% to 45% of its assets to fixed income underlying funds.

Past name: DFA VA Global Moderate Allocation Instl.

## Category Description: Global Allocation

World-allocation portfolios seek to provide both capital appreciation and income by investing in three major areas: stocks, bonds, and cash. While these portfolios do explore the whole world, most of them focus on the U.S., Canada, Japan, and the larger markets in Europe. It is rare for such portfolios to invest more than 10% of their assets in emerging markets. These portfolios typically have at least 10% of assets in bonds, less than 70% of assets in stocks, and at least 40% of assets in non-U.S. stocks or bonds.

## Volatility Analysis

In the past, this investment has shown a relatively small range of fluctuations relative to other investments. Based on this measure, currently more than two thirds of all investments have shown higher levels of risk. Consequently, this investment may appeal to investors looking for a conservative investment strategy.
