

Release Date: 12-31-2018

NVIT Mid Cap Index Fund — Class I

Investment Strategy from investment's prospectus

The investment seeks capital appreciation. The fund employs a "passive" management, or indexing, approach, which seeks to match approximately the performance of the Standard & Poor's MidCap 400 Index ("S&P MidCap 400 Index") before the deduction of fund expenses. The S&P MidCap 400 Index includes approximately 400 stocks of mid-cap U.S. companies in a wide range of businesses. Under normal circumstances, it invests at least 80% of its net assets in equity securities of companies included in the S&P MidCap 400 Index. The fund does not necessarily invest in all of the securities included in the S&P MidCap 400 Index or in the same weightings.

Past name: GVIT Mid Cap Index 1.

Category Description: Mid-Cap Blend

The typical mid-cap blend portfolio invests in U.S. stocks of various sizes and styles, giving it a middle-of-the-road profile. Most shy away from high-priced growth stocks but aren't so price-conscious that they land in value territory.

Volatility Analysis

In the past, this investment has shown a wide range of price fluctuations relative to other investments. This investment may experience significant price increases in favorable markets or undergo large price declines in adverse markets. Some of this risk may be offset by owning other investments that follow different investment strategies.
