Fidelity® VIP Growth & Income Portfolio — Service Class 2

Investment Strategy from investment's prospectus

The investment seeks high total return through a combination of current income and capital appreciation. The fund normally invests a majority of assets in common stocks with a focus on those that pay current dividends and show potential for capital appreciation. It potentially invests in bonds, including lower-quality debt securities (those of less than investment-grade quality, also referred to as high yield debt securities or junk bonds), as well as stocks that are not currently paying dividends, but offer prospects for future income or capital appreciation. The fund invests in domestic and foreign issuers.

Category Description: Large Blend

Large-blend funds have portfolios that are fairly representative of the overall U.S. stock market in size, growth rates, and price. They tend to invest across the spectrum of U.S. industries, and owing to their broad exposure, the portfolios' returns are often similar to those of the S&P 500 Index.

Volatility Analysis

In the past, this investment has shown a relatively moderate range of price fluctuations relative to other investments. This investment may experience larger or smaller price declines or price increases depending on market conditions. Some of this risk may be offset by owning other investments with different portfolio makeups or investment strategies.
