

Release Date: 03-31-2019

Federated NVIT High Income Bond Fund — Class I

Investment Strategy from investment's prospectus

The investment seeks to provide high current income. The fund invests at least 80% of its net assets in U.S. dollar-denominated high-yield bonds (commonly known as "junk bonds") of U.S. and foreign issuers, including those in emerging market countries. Securities selected for the fund normally are lower rated or are below investment grade, with no minimum acceptable rating. The fund may invest in zero-coupon bonds. It may use credit default swaps.

Past name: Federated GVIT High Income Bond 1.

Category Description: High Yield Bond

High-yield bond portfolios concentrate on lower-quality bonds. Because such bonds are riskier than those of higher-quality companies, they offer higher coupons to attract investors. Therefore, these funds generally offer higher yields than other types of funds, but they are also more vulnerable to economic and credit risk. While defaults have been rare lately, these funds can suffer losses from recessions and bankruptcies.

Volatility Analysis

In the past, this investment has shown a relatively small range of fluctuations relative to other investments. Based on this measure, currently more than two thirds of all investments have shown higher levels of risk. Consequently, this investment may appeal to investors looking for a conservative investment strategy.
