

Release Date: 09-30-2018

Federated Fund for U.S. Government Securities II

Investment Strategy from investment's prospectus

The investment seeks to provide current income. The fund normally invests primarily in a diversified portfolio of U.S. government securities, including mortgage-backed securities (MBS) of investment-grade quality and seeks to provide returns consistent with investments in the market for U.S. home mortgages. It will invest in MBS that are issued or guaranteed by U.S. government agencies or U.S. government-sponsored enterprises (GSEs). The fund may invest in non-agency MBS, which are those not issued or guaranteed by GSEs. It also may invest in asset-backed securities, other U.S. government securities and certain derivative instruments.

Past name: Federated Fund for US Govt Sec II.

Category Description: Intermediate Government

Intermediate-government funds concentrate on bonds backed by the U.S. government or by government-linked agencies. This backing minimizes the credit risk of these funds, as the U.S. government is unlikely to default on its debt. These funds have durations typically between 3.5 and six years. Consequently, the group's performance--and its level of volatility--tends to fall between that of the short government and long government bond categories.

Volatility Analysis

In the past, this investment has shown a relatively small range of fluctuations relative to other investments. Based on this measure, currently more than two thirds of all investments have shown higher levels of risk. Consequently, this investment may appeal to investors looking for a conservative investment strategy.
