

Release Date: 03-31-2019

NVIT Emerging Markets Fund — Class II

Investment Strategy from investment's prospectus

The investment seeks long-term capital growth by investing primarily in equity securities of companies located in emerging market countries. The fund invests at least 80% of its net assets in equity securities issued by companies that are tied economically to emerging market countries. The fund's manager considers a company to be tied economically to emerging market countries if it is headquartered, trades on an exchange or maintains at least 50% of its net assets in, or derives at least 50% of its revenues from, emerging market countries. The fund may invest in companies of any size, including smaller companies.

Past name: Gartmore NVIT Emerging Markets II.

Category Description: Diversified Emerging Mkts

Diversified emerging-markets funds invest at least 50% of stock assets in developing nations. Most funds divide their assets among 20 or more nations, although they tend to focus on the emerging markets of Asia and Latin America rather than on those of the Middle East, Africa, or Europe. Thus, popular destinations include Hong Kong, Korea, Mexico and Brazil. Whatever their favorite nations, all these funds have the potential for large price swings.
