

Release Date: 12-31-2018

JPMorgan Insurance Trust Small Cap Core Portfolio — Class 1

Investment Strategy from investment's prospectus

The investment seeks capital growth over the long term. The fund normally invests at least 80% of its assets in equity securities of small cap companies. Small cap companies are companies with market capitalizations equal to those within the universe of the Russell 2000 Index at the time of purchase. Sector by sector, the fund's weightings are similar to those of the Russell 2000 Index. The fund can moderately underweight or overweight sectors when the advisor believes it will benefit performance. In implementing its main strategies, the fund's investments are primarily in common stocks and real estate investment trusts (REITs).

Past name: JP Morgan ST II Small Company.

Category Description: Small Blend

Small-blend portfolios favor U.S. firms at the smaller end of the market-capitalization range and are flexible in the types of small caps they buy. Some aim to own an array of value and growth stocks while others employ a discipline that leads to holdings with valuations and growth rates close to the small-cap averages.

Volatility Analysis

In the past, this investment has shown a wide range of price fluctuations relative to other investments. This investment may experience significant price increases in favorable markets or undergo large price declines in adverse markets. Some of this risk may be offset by owning other investments that follow different investment strategies.
