MFS® VIT Global Tactical Allocation Portfolio — Service Class

Investment Strategy from investment's prospectus

The investment seeks total return. The fund seeks to achieve the fund's objective by generating returns from a combination of (1) individual security selection of a combination of debt instruments and equity securities and (2) a tactical asset allocation overlay primarily using derivative instruments to manage the fund's exposure to asset classes, markets and currencies. MFS expects to also use derivatives to seek to limit the fund's exposure to certain extreme market events if the fund's exposure to the equity security asset class, after taking into account the tactical overlay, is greater than 35% of the fund's assets.

Past name: MFS VIT II Global Tactical Allc Svc.

Category Description: World Allocation

World-allocation portfolios seek to provide both capital appreciation and income by investing in three major areas: stocks, bonds, and cash. While these portfolios do explore the whole world, most of them focus on the U.S., Canada, Japan, and the larger markets in Europe. It is rare for such portfolios to invest more than 10% of their assets in emerging markets. These portfolios typically have at least 10% of assets in bonds, less than 70% of assets in stocks, and at least 40% of assets in non-U.S. stocks or bonds.

Volatility Analysis

In the past, this investment has shown a relatively small range of fluctuations relative to other investments. Based on this measure, currently more than two thirds of all investments have shown higher levels of risk. Consequently, this investment may appeal to investors looking for a conservative investment strategy.
