MFS® VIT Mid Cap Value Portfolio — Service Class

Investment Strategy from investment's prospectus

The investment seeks capital appreciation. MFS normally invests at least 80% of the fund's net assets in issuers with medium market capitalizations. MFS generally defines medium market capitalization issuers as issuers with market capitalizations similar to those of issuers included in the Russell Midcap Value Index over the last 13 months at the time of purchase. MFS normally invests the fund's assets primarily in equity securities.

Past name: MFS VIT III Mid Cap Value Svc.

Category Description: Mid-Cap Value

Some mid-cap value funds focus on medium-size companies while others land here because they own a mix of small-, mid-, and large-cap stocks. All look for stocks that are less expensive or growing more slowly than the market. Many of their holdings come from financial, energy and manufacturing sectors.

Volatility Analysis

In the past, this investment has shown a relatively moderate range of price fluctuations relative to other investments. This investment may experience larger or smaller price declines or price increases depending on market conditions. Some of this risk may be offset by owning other investments with different portfolio makeups or investment strategies.
