NVIT CardinalSM Aggressive Fund — Class II

Investment Strategy from investment's prospectus

The investment seeks maximum growth of capital consistent with a more aggressive level of risk as compared to other CardinalSM Funds. The fund is a "fund of funds" that invests primarily in affiliated mutual funds representing a variety of asset classes. It aims to provide diversification across traditional asset classes—U.S. stocks and international stocks—by investing primarily in mutual funds offered by Nationwide Variable Insurance Trust. It allocates approximately 54% of its net assets in U.S. stocks, approximately 36% in international stocks and approximately 10% in bonds.

Category Description: Allocation—85%+ Equity

Funds in allocation categories seek to provide both income and capital appreciation by investing in multiple asset classes, including stocks, bonds, and cash. These portfolios are dominated by domestic holdings and have equity exposures of over 85%. These funds typically allocate at least 10% to equities of foreign companies and do not exclusively allocate between cash and equities.

Volatility Analysis

In the past, this investment has shown a relatively moderate range of price fluctuations relative to other investments. This investment may experience larger or smaller price declines or price increases depending on market conditions. Some of this risk may be offset by owning other investments with different portfolio makeups or investment strategies.
