# NVIT Cardinal<sup>SM</sup> Capital Appreciation Fund — Class II

## Investment Strategy from investment's prospectus

The investment seeks growth of capital, but also seeks income consistent with a less aggressive level of risk as compared to other Cardinal<sup>SM</sup> Funds. The fund is a "fund of funds" that invests primarily in affiliated mutual funds representing a variety of asset classes. It aims to provide diversification across traditional asset classes—U.S. stocks, international stocks, and bonds—by investing primarily in mutual funds offered by Nationwide Variable Insurance Trust. The fund allocates approximately 44% of its net assets in U.S. stocks, approximately 26% in international stocks and approximately 30% in bonds.

## Category Description: Allocation—50% to 70% Equity

Funds in allocation categories seek to provide both income and capital appreciation by investing in multiple asset classes, including stocks, bonds, and cash. These portfolios are dominated by domestic holdings and have equity exposures between 50% and 70%.

## Volatility Analysis

In the past, this investment has shown a relatively moderate range of price fluctuations relative to other investments. This investment may experience larger or smaller price declines or price increases depending on market conditions. Some of this risk may be offset by owning other investments with different portfolio makeups or investment strategies.
