

NVIT Core Bond Fund — Class I

Investment Strategy from investment's prospectus

The investment seeks a high level of current income consistent with preserving capital. The fund invests at least 80% of its net assets in a wide variety of investment-grade fixed-income securities, such as corporate bonds, U.S. government securities, and mortgage-backed and asset-backed securities. It may also invest in high-yield bonds (commonly known as "junk bonds"), as well as foreign government and corporate bonds that are denominated in U.S. dollars. The fund seeks to achieve its objective by investing in securities offering the highest level of expected income while seeking safety of principal.

Category Description: Intermediate-Term Bond

Intermediate-term bond funds have durations that are greater than 3.5 and less than six years. Most of the funds rotate among a variety of sectors in the bond market, based upon which appear to offer better values. Whatever types of bonds they hold, these funds are less sensitive to interest rates, and therefore less volatile, than funds that have longer durations.

Volatility Analysis

In the past, this investment has shown a relatively small range of fluctuations relative to other investments. Based on this measure, currently more than two thirds of all investments have shown higher levels of risk. Consequently, this investment may appeal to investors looking for a conservative investment strategy.
