

NVIT International Index Fund — Class Y

Investment Strategy from investment's prospectus

The investment seeks to match the performance of the MSCI Europe, Australasia and Far East Index ("MSCI EAFE Index") as closely as possible before the deduction of fund expenses. The fund's manager employs a "passive" management, or indexing, approach, which seeks to match approximately the performance of the MSCI EAFE Index before the deduction of fund expenses. It invests at least 80% of its net assets in a statistically selected sampling of equity securities of companies included in the MSCI EAFE Index. The MSCI EAFE Index includes common stocks of large- and mid-cap companies located in Europe, Australia and Asia (including the Far East).

Past name: GVIT International Index ID.

Category Description: Foreign Large Blend

Foreign large-blend funds invest in a variety of big international stocks. Most of these funds divide their assets among a dozen or more developed markets, including Japan, Britain, France, and Germany. They tend to invest the rest in emerging markets such as Hong Kong, Brazil, Mexico and Thailand. These funds typically will have less than 20% of assets invested in U.S. stocks.

Volatility Analysis

In the past, this investment has shown a relatively moderate range of price fluctuations relative to other investments. This investment may experience larger or smaller price declines or price increases depending on market conditions. Some of this risk may be offset by owning other investments with different portfolio makeups or investment strategies.
