

Release Date: 03-31-2019

NVIT Managed American Funds Asset Allocation Fund — Class II

Investment Strategy from investment's prospectus

The investment seeks to provide a high total return consistent with preservation of capital over the long term. The fund consists of two main components. First, a majority of its portfolio, referred to herein as the "Core Sleeve," operates as a "fund-of-funds" that invests in the Asset Allocation FundSM, a series of American Funds Insurance Series (the "underlying fund"). The underlying fund is designed for investors seeking both capital appreciation and income. The remainder of the fund, referred to herein as the "Volatility Overlay," invests in short-term fixed-income securities (or mutual funds that themselves invest in such securities) or is held in cash.

Category Description: Allocation—50% to 70% Equity

Funds in allocation categories seek to provide both income and capital appreciation by investing in multiple asset classes, including stocks, bonds, and cash. These portfolios are dominated by domestic holdings and have equity exposures between 50% and 70%.

Volatility Analysis

In the past, this investment has shown a relatively small range of fluctuations relative to other investments. Based on this measure, currently more than two thirds of all investments have shown higher levels of risk. Consequently, this investment may appeal to investors looking for a conservative investment strategy.
