

Release Date: 12-31-2018

NVIT Multi-Manager Large Cap Growth Fund — Class II

Investment Strategy from investment's prospectus

The investment seeks long-term capital growth. The fund invests at least 80% of its net assets in equity securities issued by large-cap companies. It employs a "growth" style of investing. In other words, it seeks companies whose earnings or cash flow are expected to grow consistently faster than those of other companies. The fund may invest in stocks of large-cap companies that are located outside the United States. The subadviser generally considers selling a security when it reaches a target price, fails to perform as expected, or when other opportunities appear more attractive.

Category Description: Large Growth

Large-growth funds invest primarily in big companies that are projected to grow faster than other large-cap stocks. Most of these funds focus on companies in rapidly expanding industries.

Volatility Analysis

In the past, this investment has shown a wide range of price fluctuations relative to other investments. This investment may experience significant price increases in favorable markets or undergo large price declines in adverse markets. Some of this risk may be offset by owning other investments that follow different investment strategies.
