

NVIT Jacobs Levy Large Cap Growth Fund — Class I

Investment Strategy from investment's prospectus

The investment seeks long-term capital growth. The fund takes long and short positions in large-capitalization companies using the subadviser's dynamic multidimensional investment process that combines human insight and intuition, finance and behavioral theory, and quantitative and statistical techniques. Under normal circumstances, the fund invests at least 80% of its net assets in equity securities issued by large-capitalization companies or derivatives the value of which are linked to equity securities issued by large-capitalization companies. It employs a growth style of investing.

Category Description: Large Growth

Large-growth funds invest primarily in big companies that are projected to grow faster than other large-cap stocks. Most of these funds focus on companies in rapidly expanding industries.

Volatility Analysis

In the past, this investment has shown a relatively moderate range of price fluctuations relative to other investments. This investment may experience larger or smaller price declines or price increases depending on market conditions. Some of this risk may be offset by owning other investments with different portfolio makeups or investment strategies.
