

Release Date: 12-31-2018

NVIT Multi-Manager Large Cap Value Fund — Class I

Investment Strategy from investment's prospectus

The investment seeks long-term capital growth. The fund invests at least 80% of its net assets in equity securities issued by large-cap companies. It employs a "value" style of investing, which means investing in equity securities that the fund's subadvisers believe to be trading at prices that do not reflect a company's intrinsic value. The fund may invest in stocks of large-cap companies that are located outside the United States. The subadviser generally considers selling a security when it reaches a target price, fails to perform as expected, or when other opportunities appear more attractive.

Category Description: Large Value

Large-value funds invest primarily in big U.S. companies that are less expensive or growing more slowly than other large-cap stocks. These funds often feature investments in energy, financial or manufacturing sectors.

Volatility Analysis

In the past, this investment has shown a relatively moderate range of price fluctuations relative to other investments. This investment may experience larger or smaller price declines or price increases depending on market conditions. Some of this risk may be offset by owning other investments with different portfolio makeups or investment strategies.
