

Release Date: 03-31-2019

NVIT Multi-Manager Mid Cap Growth Fund — Class II

Investment Strategy from investment's prospectus

The investment seeks long-term capital growth. The fund invests at least 80% of its net assets in equity securities issued by mid-cap companies. It employs a "growth" style of investing. The fund may invest in stocks of mid-cap companies that are located outside the United States. It may invest in any economic sector and, at times, emphasize one or more particular sectors. The subadviser generally considers selling a security when it reaches a target price, fails to perform as expected, or when other opportunities appear more attractive.

Category Description: Mid-Cap Growth

Some mid-cap growth funds invest in stocks of all sizes, thus leading to a mid-cap profile, but others focus on midsize companies. Mid-cap growth funds target firms that are projected to grow faster than other mid-cap stocks, therefore commanding relatively higher prices. Many of these stocks are found in the volatile technology, health-care and service sectors.

Volatility Analysis

In the past, this investment has shown a wide range of price fluctuations relative to other investments. This investment may experience significant price increases in favorable markets or undergo large price declines in adverse markets. Some of this risk may be offset by owning other investments that follow different investment strategies.
