

Release Date: 09-30-2018

NVIT Multi-Manager Mid Cap Value Fund — Class I

Investment Strategy from investment's prospectus

The investment seeks long-term capital appreciation. Under normal conditions, the fund invests at least 80% of its net assets in equity securities issued by mid-cap companies. It employs a "value" style of investing, which means investing in equity securities that the fund's subadvisers believe to be trading at prices that do not reflect a company's intrinsic value. The fund may invest in stocks of mid-cap companies that are located outside the United States. It may invest in any economic sector and, at times, emphasize one or more particular sectors.

Category Description: Mid-Cap Value

Some mid-cap value funds focus on medium-size companies while others land here because they own a mix of small-, mid-, and large-cap stocks. All look for stocks that are less expensive or growing more slowly than the market. Many of their holdings come from financial, energy and manufacturing sectors.

Volatility Analysis

In the past, this investment has shown a relatively moderate range of price fluctuations relative to other investments. This investment may experience larger or smaller price declines or price increases depending on market conditions. Some of this risk may be offset by owning other investments with different portfolio makeups or investment strategies.
