NVIT Short Term Bond Fund — Class II

Investment Strategy from investment's prospectus

The investment seeks to provide a high level of current income while preserving capital and minimizing fluctuations in share value. The fund invests at least 80% of its net assets in a wide variety of investment-grade fixed-income securities, such as corporate bonds, U.S. government securities, mortgage-backed and asset-backed securities and commercial paper. Up to 10% of the fund's net assets also may be invested in high-yield bonds (commonly known as "junk bonds").

Past name: NVIT Short Term Bond II.

Category Description: Short-Term Bond

Short-term bond portfolios invest primarily in corporate and other investment-grade U.S. fixed-income issues and typically have durations of 1.0 to 3.5 years. These portfolios are attractive to fairly conservative investors, because they are less sensitive to interest rates than portfolios with longer durations.

Volatility Analysis

Investment

Category

In the past, this investment has shown a relatively small range of fluctuations relative to other investments. Based on this measure, currently more than two thirds of all investments have shown higher levels of risk. Consequently, this investment may appeal to investors looking for a conservative investment strategy.
