

# NVIT iShares Fixed Income ETF Fund — Class Y

## Investment Strategy from investment's prospectus

The investment seeks total return. The fund is a "fund-of-funds" that aims to provide diversification across traditional fixed-income asset classes—U.S. and foreign corporate bonds, U.S. government bonds, sovereign bonds issued by foreign governments, mortgage-backed securities and asset-backed securities—by investing in a portfolio of unaffiliated ETFs sponsored by BlackRock Fund Advisors ("BFA") and which utilize a passive index-based strategy to track the performance of fixed-income indexes. The fund invests, under normal circumstances, at least 80% of its net assets in fixed-income securities through its investments in ETFs.

### Category Description: Intermediate Core Bond

Intermediate-term core bond portfolios invest primarily in investment-grade U.S. fixed-income issues including government, corporate, and securitized debt, and hold less than 5% in below-investment-grade exposures. Their durations (a measure of interest-rate sensitivity) typically range between 75% and 125% of the three-year average of the effective duration of the Morningstar Core Bond Index.

### Volatility Analysis

In the past, this investment has shown a relatively small range of fluctuations relative to other investments. Based on this measure, currently more than two thirds of all investments have shown higher levels of risk. Consequently, this investment may appeal to investors looking for a conservative investment strategy.
