NVIT iShares Global Equity ETF Fund — Class II

Investment Strategy from investment's prospectus

The investment seeks long-term capital appreciation. The fund is a "fund-of-funds" that aims to provide diversification across traditional equity asset classes—large-cap, mid-cap and small-cap stocks issued by both U.S. and foreign issuers—by investing in a portfolio of unaffiliated ETFs sponsored by BlackRock Fund Advisors ("BFA") and which utilize a passive index-based strategy to track the performance of equity indexes. The fund invests, under normal circumstances, at least 80% of its net assets in equity securities through its investments in ETFs.

Category Description: World Large Stock

World large stock portfolios invest in a variety of international stocks that are larger. World-stock portfolios have few geographical limitations. It is common for these portfolios to invest the majority of their assets in developed markets, with the remainder divided among the globe's smaller markets. These portfolios typically have 20%-60% of assets in U.S. stocks.
