

# Neuberger Berman AMT U.S. Equity Index PutWrite Strategy Portfolio — S Class Shares

## Investment Strategy from investment's prospectus

The investment seeks long-term growth of capital and income generation. The fund seeks to achieve its goal primarily through a strategy of writing collateralized put options on both U.S. indices, including the S&P 500 Index and the Russell 2000 Index, and exchange traded funds ("ETFs"). The advisor attempts to generate returns through the receipt of option premiums from selling puts, as well as through investments in fixed income instruments, which collectively are intended to reduce volatility relative to what it would be if the fund held the underlying equity index on which the options are written.

Past name: Neuberger Berman AMT Abs Ret MultiMgr S.

## Category Description: Multialternative

These funds offer investors exposure to several different alternative investment tactics. Funds in this category have a majority of their assets exposed to alternative strategies. An investor's exposure to different tactics may change slightly over time in response to market movements. Funds in this category include both funds with static allocations to alternative strategies and funds tactically allocating among alternative strategies and asset classes. The gross short exposure is greater than 20%.

## Volatility Analysis

In the past, this investment has shown a relatively small range of fluctuations relative to other investments. Based on this measure, currently more than two thirds of all investments have shown higher levels of risk. Consequently, this investment may appeal to investors looking for a conservative investment strategy.
