

PIMCO VIT High Yield Portfolio — Administrative Class

Investment Strategy from investment's prospectus

The investment seeks maximum total return, consistent with preservation of capital and prudent investment management. The portfolio seeks to achieve its investment objective by investing under normal circumstances at least 80% of its assets in high yield investments ("junk bonds"), which may be represented by forwards or derivatives such as options, futures contracts or swap agreements. It may invest up to 20% of its total assets in securities rated Caa or below by Moody's, or equivalently rated by S&P or Fitch, or, if unrated, determined by PIMCO to be of comparable quality.

Category Description: High Yield Bond

High-yield bond portfolios concentrate on lower-quality bonds. Because such bonds are riskier than those of higher-quality companies, they offer higher coupons to attract investors. Therefore, these funds generally offer higher yields than other types of funds, but they are also more vulnerable to economic and credit risk. While defaults have been rare lately, these funds can suffer losses from recessions and bankruptcies.

Volatility Analysis

In the past, this investment has shown a relatively small range of fluctuations relative to other investments. Based on this measure, currently more than two thirds of all investments have shown higher levels of risk. Consequently, this investment may appeal to investors looking for a conservative investment strategy.
