

Release Date: 09-30-2018

PIMCO VIT Real Return Portfolio — Administrative Class

Investment Strategy from investment's prospectus

The investment seeks maximum real return, consistent with preservation of real capital and prudent investment management. The portfolio seeks to achieve its investment objective by investing under normal circumstances at least 80% of its net assets in inflation-indexed bonds of varying maturities issued by the U.S. and non-U.S. governments, their agencies or instrumentalities and corporations, which may be represented by forwards or derivatives such as options, futures contracts or swap agreements. Assets not invested in inflation-indexed bonds may be invested in other types of Fixed Income Instruments.

Past name: PIMCO VIT Real Return Bond Admin.

Category Description: Inflation-Protected Bond

Inflation-protected bond portfolios invest primarily in fixed-income that increase coupon and/or principal payments at the rate of inflation. These bonds can be issued by any organization, but the U.S. Treasury is currently the largest issuer for these types of securities. Most of these portfolios buy bonds with intermediate- to long-term maturities.

Volatility Analysis

In the past, this investment has shown a relatively small range of fluctuations relative to other investments. Based on this measure, currently more than two thirds of all investments have shown higher levels of risk. Consequently, this investment may appeal to investors looking for a conservative investment strategy.
