

Release Date: 09-30-2017

Pioneer Emerging Markets VCT Portfolio — Class I

Investment Strategy from investment's prospectus

The investment seeks long-term growth of capital. The portfolio invests primarily in securities of emerging market issuers. Although it invests in both equity and debt securities, it normally emphasizes equity securities in its portfolio. Normally, the fund invests at least 80% of its total assets in the securities of emerging market corporate and government issuers. It invests in at least six emerging markets. The fund may invest up to 20% of its total assets in securities of issuers in any developed country.

Category Description: Diversified Emerging Mkts

Diversified emerging-markets funds invest at least 50% of stock assets in developing nations. Most funds divide their assets among 20 or more nations, although they tend to focus on the emerging markets of Asia and Latin America rather than on those of the Middle East, Africa, or Europe. Thus, popular destinations include Hong Kong, Korea, Mexico and Brazil. Whatever their favorite nations, all these funds have the potential for large price swings.

Volatility Analysis

In the past, this investment has shown a wide range of price fluctuations relative to other investments. This investment may experience significant price increases in favorable markets or undergo large price declines in adverse markets. Some of this risk may be offset by owning other investments that follow different investment strategies.
