

Release Date: 09-30-2018

# T. Rowe Price Health Sciences Portfolio

## Investment Strategy from investment's prospectus

The investment seeks long-term capital appreciation. The fund will normally invest at least 80% of its net assets (including any borrowings for investment purposes) in the common stocks of companies engaged in the research, development, production, or distribution of products or services related to health care, medicine, or the life sciences (collectively termed "health sciences"). While the fund can invest in companies of any size, the majority of fund assets are expected to be invested in large- and mid-capitalization companies.

Past name: T. Rowe Price Health Sciences.

## Category Description: Health

Health portfolios focus on the medical and health-care industries. Most invest in a range of companies, buying everything from pharmaceutical and medical-device makers to HMOs, hospitals, and nursing homes. A few funds concentrate on just one industry segment, such as service providers or biotechnology firms.

## Volatility Analysis

Investment

In the past, this investment has shown a wide range of price fluctuations relative to other investments. This investment may experience significant price increases in favorable markets or undergo large price declines in adverse markets. Some of this risk may be offset by owning other investments that follow different investment strategies.
