Be sure to choose a product that meets long-term life insurance needs, especially if personal situations change — for example, marriage, birth of a child or job promotion. Weigh the costs of the policy, and understand that life insurance has fees and charges that vary with sex, health, age and tobacco use. Riders that customize a policy to fit individual needs usually carry an additional charge.

Indexed universal life insurance policies are not stock market investments, do not directly participate in any stock or equity investments, and do not receive dividend or capital gains participation. Past index performance is no indication of future crediting rates. Also, be aware that interest crediting fluctuations can lead to the need for additional premium in the policy.
